**'If you thought you knew water, then think again. This book guarantees to give you a fun and innovative look at our planet's most plentiful resource. It will immerse you in a sea of facts that you never knew existed!'**

**Jon Dee**  
Founder of Planet Ark

'Water...The Amazing Journey' is the third book in the series *Environmental Education ...Serious Fun* created by Australian author and environmentalist, Caren Trafford. Her first 2 books have sold in Australia, New Zealand, the U.K, Canada & Korea.

Written as narrative non-fiction, **Water...The Amazing Journey** invites readers to take a journey of discovery. Blending fascinating factoids, wicked humour and bright illustrations, this book is both educational and fun.

Water is everywhere and without water, life as we know it would cease. Since the beginning,, water has flowed around this planet creating and sustaining all manner of life.

So what does water think about it all? Discover the amazing daily routine of water droplets through the ages and around the planet.

Learn facts about the great waterfalls, rivers and oceans. Find out why water droplets like to wear wellies. Understand the journey of Water. Where does Water come from and where does it go? Travel the Water Cycle and discover things you never knew. Why is water so important? How much is there? How powerful is it and what does it do in its spare time?

And humans? How has our relationship with water changed over time? What are we doing with it and what does water think about it all.

In today's climate of drought,, water conservation needs to be taught to everyone. Lets find out how we can help Wasu and the water droplets to manage water so that there is enough for the future generations.

**Water...the Amazing Journey** will take you full circle as you follow the journey of Wasu and the Water droplets, - and by the way...don't forget to wave....

**Educating children on issues of critical importance is never easy.  
By combining humour, illustration and fact, this series has created the perfect vehicle to appeal to teachers, students and parents.**

**'It's not PLANET EARTH, surely? It should be PLANET WATER. Caren has done it again! The most pellucid, penetrating and panoramic paeon to H2O I've ever seen.  
A sopping great triumph...It's brilliant.'**

**Robyn Williams-** presenter ABC Science Show
