**POSTER PACKS:** High resolution—suitable for classrooms and homes

'Exceptional books are needed to make a difference. Combining humour and science, this book is the key to educating generations about the beauty and fragility of this planet. '

At last a book that captures the science, explores the problems, pulls no punches and leaves no turd unturned.

This 1<sup>st</sup> book in this series sold 5,000 copies in the Australian market in just 9 months.

Worms have been around since the days of the dinosaurs.... eating their way through piles of giant, steamy dung heaps and turning it into worm poo – Nature's fertiliser.

Sounds easy ... but worms and the planet came under attack when humans, built mega cities, developed industries and fell in love with chemical fertilisers and poison sprays.

**And yet, worms have survived....**

This book charts their progress from prehistory, through Cleopatra's love, Aristotle's philosophy, Darwin's research, to today when, believe it or not, worms are dining in 5 star restaurants and holidaying in 5 star resorts.

**Endorsed by leading academics** at all three levels – primary, secondary and university

Listed by the NSW Department of Education

**NSW Premier's Challenge 2003, 2004 & 2005**

**Factual Category**

Extensive media coverage

Press, magazines, television including Channel 10's "**Totally Wild**"

**Educating children on issues of critical importance is never easy.**

**By combining humour, illustration and fact, this series has created the perfect vehicle to appeal to teachers, students and parents.**
