**SHORTLISTED for the  
2009 Wilderness Society  
Environment Award  
for Children's Literature**

### ENERGY EXPLAINED ... be enLIGHTened ...

#### Meet the Renewables and get over those Fossils.

**The Renewables...**they've always been around. So why did the old fossils take over their turf? Understand what happens when fossil fuels are burnt, adding members of the **Greenhouse Gas Gang** into the atmosphere.

The 6th book in the *Environmental Education Serious Fun*, series. Complex science of Energy is simplified to help everyone better understand the mechanisms at play.

**Coal, Oil, Gas** as well as  
**Wind, Sun, Water, Biomass and Geothermal**  
present their case.

Facts, insights and solutions are packaged in a unique blend of text, illustration and humour.

Designed for students who are asking the difficult questions, *POW! Meet the Renewables* provides easily accessible knowledge for parents and teachers alike.

Stage 2 & 3. Kids 7-14

32pp Format: 280mm x 230mm

**APN: 978-0-9581878-4-8**
