

Back from the Brink

Weather or Not... it's a Climate for Change, is the 5th book in the series, **Environmental Education... Serious Fun**, created by Australian author and environmentalist, Caren Trafford.

Who are the **Green House Gas Gang**? Essential to life on Earth, explore how they got out of balance.

Understand what happens when they hold up sunbeams as they try to escape Earth's atmosphere.

The complex science of weather and climate is reduced so that everyone can better understand the mechanisms that transfer the energy (heat) flows around the planet—El Nino and ocean currents, wind patterns, water cycles and ozone holes and the atmosphere itself.

Free of politics — the facts, insights and solutions are packaged in a unique blend of text, illustration and humour.

Global warming has a solution. The book explores everything from personal actions we each can take to reduce emissions, to complex long term energy substitution options that require multi-national cooperation.

This book, while designed for students who are asking the difficult questions, provides easily accessible knowledge for parents and teachers alike.

KEY TOPICS COVERED

- Our amazing Atmosphere
- What makes Weather and Climate?
- Weather Terminology
- History of Meteorology
- Making Weather—Cloud Seeding
- Causes of Climate Change?
- Greenhouse Gases Explained—nature out of balance
- Global & Local Impacts of Climate Change
- Clean Energy Sources — our Renewable Future
- Personal Solutions - we can each make a difference

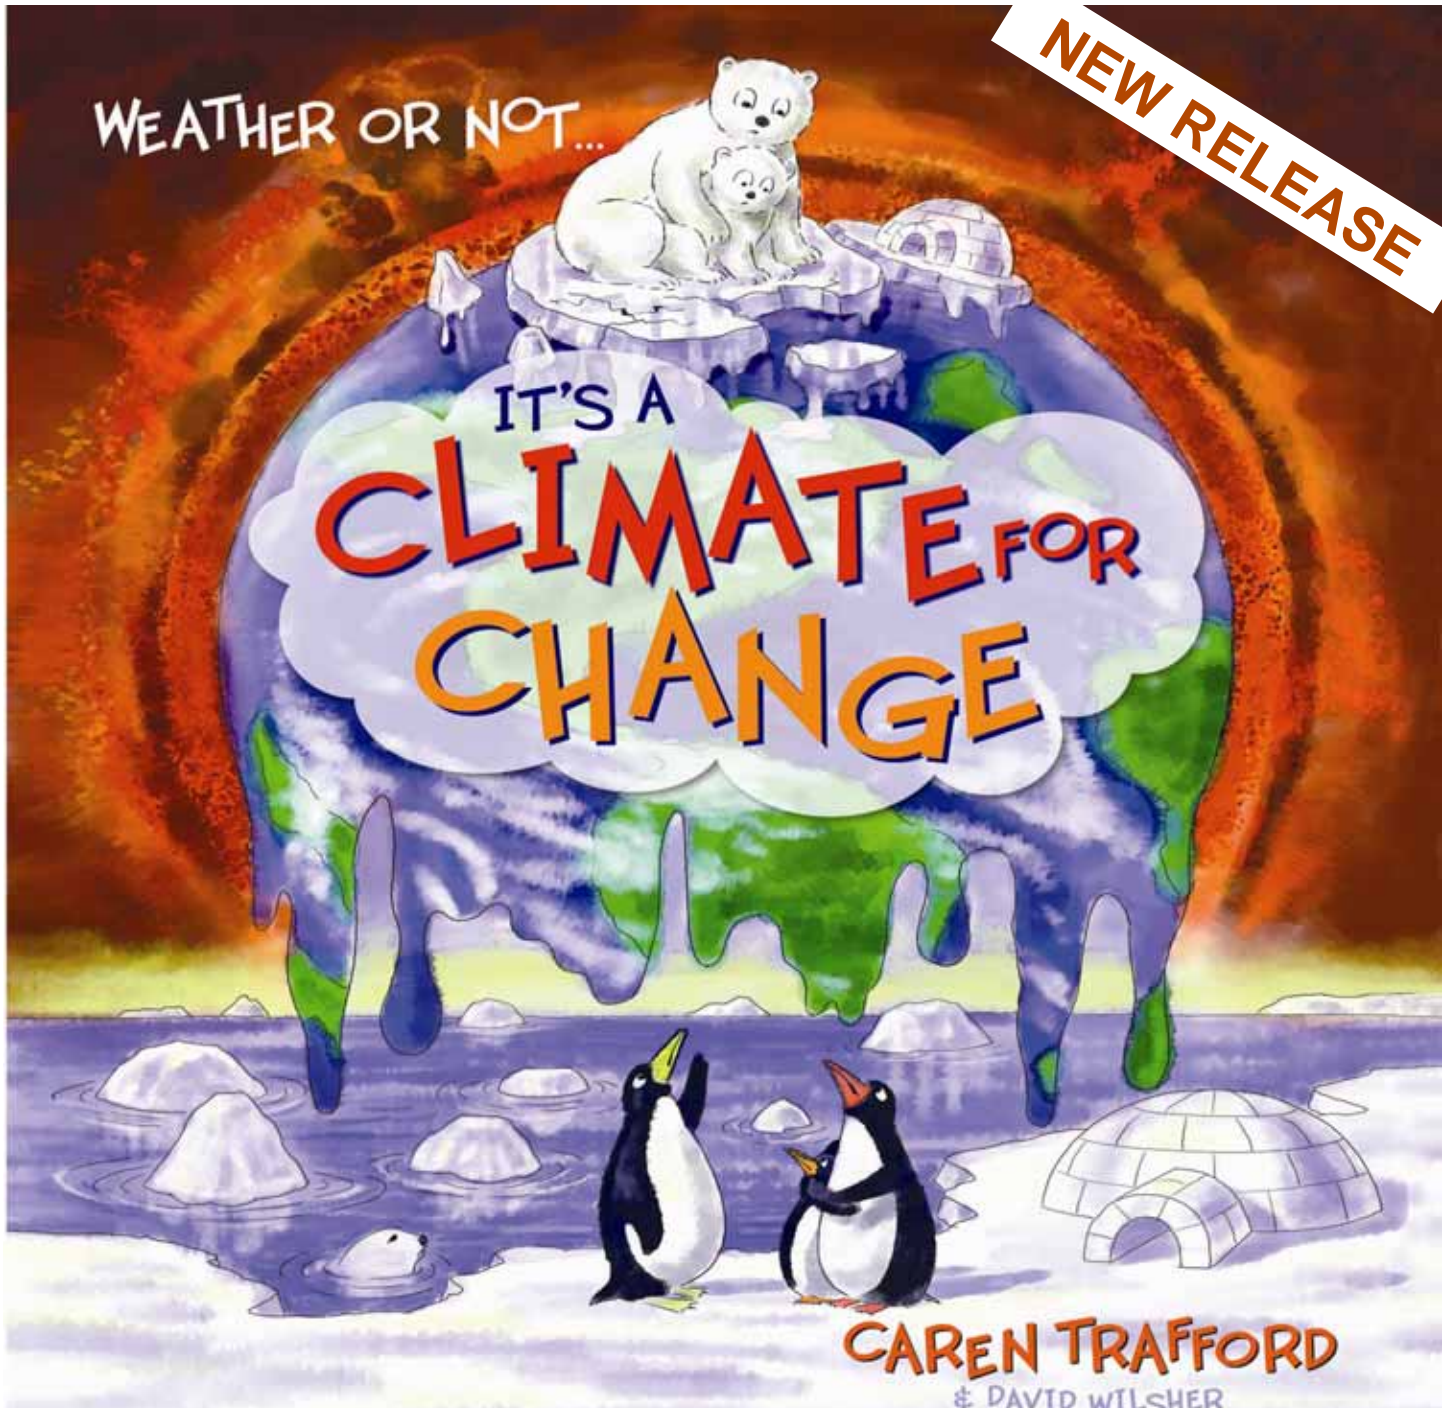

“A complex subject made easily accessible to young people.” **Lee Durrell**, Durrell Wildlife Conservation Trust

“Caren weaves her characters around this global issue so beautifully you will be blown away! This is a great tool for sustainability education.” **Merren Wilkinson**, Hydro Tasmania

“ I wish there was a book like this for every subject. Learning would be so much more fun.” **Maddie C.** Year 9

WEATHER OR NOT...

NEW RELEASE

Climate Change made Clear

'Complex science simplified in a way that makes readers of all ages appreciate what's happening to our climate & what we can all do to help save our planet.'

Mike Bailey, Weather Presenter & Producer for ABC TV News
