School Talks & Presentations

on subjects relating to Environmental Education

Using narrative non-fiction, these books have been designed to excite children, appeal to students' interest, help lesson planning for teachers and amuse adults.

"Your books are absolutely fantastic!

I have been trialling them ... the teachers love them... and I think they should be in all the schools on Earth"

Molly Harriss-Olson, Director EcoFutures

Description of School & Conference Talks

Caren Trafford speaks passionately about how everyone - but especially our students - can make a difference in the world. In an interactive presentation, tailored from 30-50 minutes, she talks about how she became known as the 'worm poo lady' and how her characters have been created to inspire students to become environmental heroes at school and home. With a large pictorial content and a myriad of interesting facts and questions, Caren challenges her audience to think about the environment and what they can do to make a difference.

Books are part of the NSW Premier's Reading Challenge

Fees

\$400+ GST for 2 sessions: \$500+ GST for 3 sessions

"Thank you so much for your fabulous contribution to our kids and our wider community. We had a fantastic day of learning for everyone and there is much 'a-buzz' about as the interest continues to flow..."

Helen Wardega, Principal, Picnic Point Public School

Dear Caren,

I enjoyed your book immensely. I feel that it is an inspiration to all young writers and shows how much humans can do for this world, animals and more so worms. I hope that someday humans and worms will live together and we will understand the worm population alot better than we do now. Your imagination is wonderful. Please KEEP WRITING!

Love
