

How Do You Do?

Who's in the POO?

Fun Sheet for School and Home

There's much more to POO than meets the eye.

Ask a scatologist! POO can tell you all sorts of things about the creature that poo-duced it. If you were a lion that lived in the bush and you came across a nice juicy piece of POO, you'd know, just by sniffing...

What it last ate

How old it is...

Where it lives...

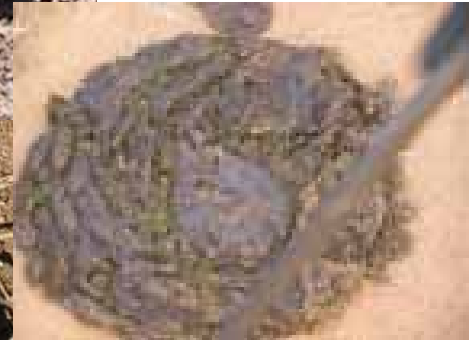

Where in the mating cycle it is

Whether it is male or female...

In fact POO is the main calling card for animals in the wild.

Who's POO is this?

What do you do when you're in the POO?

- Hippo?
- Elephant?
- Banded Mongoose?
- Cape Buffalo?
- Hyena?
- Leopard?
- Impala?
